

Data Culture and Quality

- [*IDEA Data Center Part B Data System Framework*](#): This IDC tool provides a structure for the collection, analysis, use, and reporting of high-quality special education data built around six components: purpose and vision, data governance and management, stakeholder engagement, IT system design and development, data use, and sustainability.
- [*IDEA Data Quality: Outlier Analyses Tools*](#): These three IDC resources include a brief that introduces the principles of outlier analysis, a step-by-step tutorial on options for completing outlier analysis, and an Excel template that state staff can use to conduct outlier analyses with their local data.
- [*The DaSy Data System Framework*](#): The framework is the data systems component of the larger Early Childhood Technical Assistance Center (ECTA) System Framework for Part C and Section 619. The purpose of the tool is to assist Part C and Section 619 programs in developing and enhancing high-quality state data systems and in improving the quality of their IDEA data.
